

ATV For Sale

Article by: Seth Miller

Suzuki, Yamaha, Honda, Kawasaki, Arctic Cat, and Deere and Company are some of the major players in the all-terrain-vehicle market today. Honda made the first three-wheeled ATV in 1930. Most of the companies have the Utility, Sport and Kids range of ATVs.

Suzuki has various models like the King Quad 700, Twin Peaks 700, Vinson, Eiger and Ozark range of ATVs as utility vehicles. Its Racing range has the QuadRacer and the QuadSport models. It also has the QuadSport 80 and QuadSport Z50 in its kid's range.

The company has various SOHC and DOHC models. Single Over Head Cam models have an internal combustion engine design, with one camshaft located above the valves. A Dual Over Head Cam model has the camshafts which operate the intake and exhaust valves mounted above the camshafts. Also, there are separate camshafts for inlet and exhaust valves.

The ATVs have an option of four- or two- and front-differential-locked four-wheel drives. Suzuki ATVs have their own fuel-injection system, featuring technology tested through years of development. All Suzuki ATVs are built of high tensile steel and have hydraulic front-end brakes. They generally have a 695 cc engine.

Honda has the TRX series, the TRX 250EX, TRX 300 EX, TRX 400 EX and the TRX 90 for kids. It also has the TRX 450R in electric start and kick-start mode. The TRX models are sports models, while the utility models are the FourTrax series, the Rincon, Rincon GPScape, Foreman Rubicon, Rancher and Recon models.

The Honda utility models have a 700 cc engine and electronic fuel injection. They also have fully independent fuel injection.

Yamaha has the Grizzly, Kodiak, Big Bear and Bruin models of ATVs. It also has the Grizzly 80, the ATV aimed at kids. It has unveiled new models as a celebration of their fiftieth anniversary in the business of making transport. Yamaha ATVs have liquid-cooled, five-valve, 660cc four-stroke engines. It is also available in two-wheel-drive, four-wheel-drive and fully locked differential four-wheel-drives.

Kawasaki has its own range of ATVs for Sport, Utility, Sport-Utility and Kids. They have the KFX 50, 80, 400, 700 IG and 700. The utility models are Brute Force, Prairie and Bayou.

Kawasaki ATVs have a powerful V-twin engine and automatic transmission. They also have a racing-style chassis. The KFX 700 is now available in two new colors, meteor blue and galaxy silver.
