

# Gas Scooter

---

*Article by: Terry Price*

A gas scooter is a ton of fun and will save you many hard-earned dollars on gasoline. With fuel prices soaring, the scooter is becoming very popular for a commuting vehicle or just simply going to and from the corner store to run a few errands. With the vast selection available in almost every shape and size it is easy to find exactly the scooter that will fit your needs. They also come in the form of karts, skateboards, and choppers. Entry level scooters will usually have a 20+ cc motor and can reach speeds of 18 + MPH. Even if you're a bit on the heavy side, it can carry a remarkable 350-pound capacity. Now isn't that something! You will find this gas scooter is most suitable for ages 10 and up and is more adult friendly because of its direct drive system offering a better power band. Then there are intermediate sizes with motor sizes in the 35cc and higher range that will carry you along at 18 plus MPH and have a 250-pound capacity.

Many will have removable seats and centrifugal clutches and will fold into a size that might even fit into your suitcase if you push hard enough! You will find tires in the 8 to 9-inch range and will also sport disc brakes for your safety. Looking into the bigger gas scooter models, there then comes the 50cc plus size with its 350-pound capacity and will whisk you nicely along at 28 + MPH. These scooters come with 9 or 10-inch tires and include front and rear disc brakes, and also include the removable seats.

When it comes to performance modifications, like most other motorized vehicles the sky is the limit. You can get larger motors for them that sport 2.5 HP and can offer you speeds in excess of 35 MPH. The next scooter, usually reserved for the younger person or anyone with a sense of adventure is the off-road or racing scooter. This gas scooter is a ton of fun and is recommended for ages over 13 years old. Here is some great information on the gas scooter: <http://www.motorized-scooters-wholesale.com/gas-powered-scooters.html>

With these off road or competition scooters, speeds of 40 MPH or higher are attainable and most come with dual front shocks. Some standard items such as front and rear disc brakes are common. They have a great torque capacity and will even lug a 350-pound person up a hill without a problem.
